Your local brick specialists

EH Smith are recognised as one of the largest suppliers of bricks to the construction industry for over 100 years.

Our network of 11 branches and two bulk brick yards stock over 18 million bricks at any one time. Each of our branches has a comprehensive brick display packed with an array of choices to suit any project, with our brick specialists on hand to help with any new or existing enquiries, ensuring we offer the right solution first time.

Brick Ancillaries

We have a full range of brick work ancillaries in stock at our branches to help you get the job done.

Keystone
LINTELS

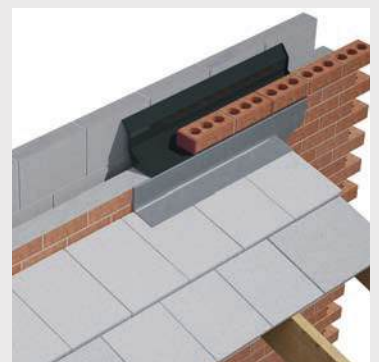

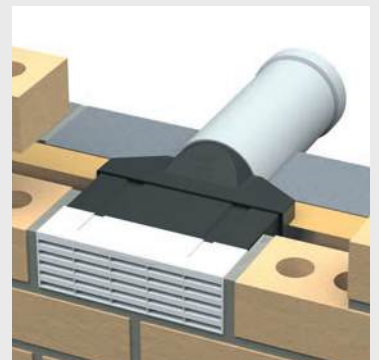

Combining structural steel strength with design using a built-in brick slip shelf to achieve a consistent external profile. Manufactured to match standard brick coursing heights reducing cutting on site with a range that covers everything from standard cavity walls to steeper pitch or heavy-duty spans.

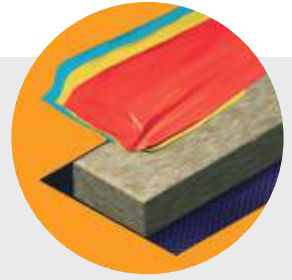

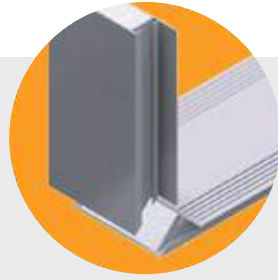

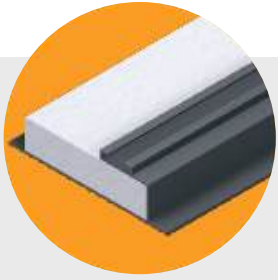

- Fast installation
- Fewer on-site adjustments
- Consistent finish

**Achieve Psi Value: 0.03-0.06
with Hi-Therm+ Lintels**

Offering a wide range of injection-moulded plastic and pre-formed lead cavity trays and closers, stop socks, weep vents, airbricks and telescopic vents. Their products are designed to speed up installation times, minimize on-site waste, and ensure compliance with building regulations regarding moisture control and fire stopping.

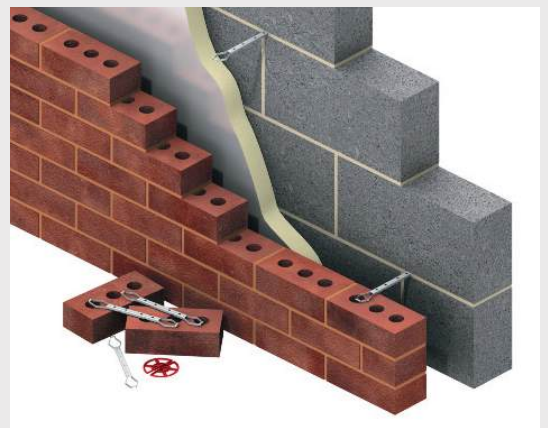

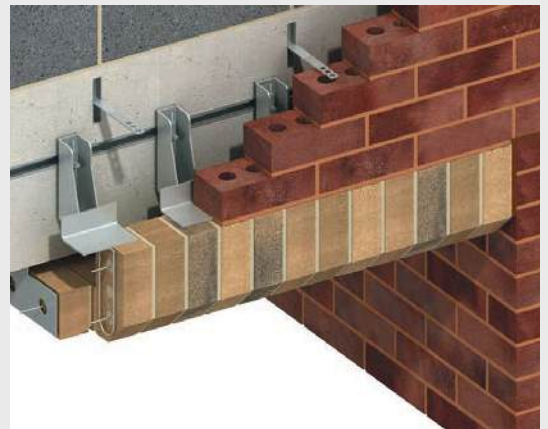

Offers a comprehensive range of BBA-certified insulated cavity closers, frame formers, fire-rated barriers, and DPCs. Their products help contractors meet strict Building Regulations (Parts B, C, and L) by preventing cold bridging, moisture penetration, and fire spread around window and door reveals.

Made from stainless steel, Multi Starter's use individual "turn and slide" ties that adjust to suit different brick and block sizes, covering wall leaf thicknesses from 60mm up to 250mm, so one system handles most standard build-ups. It's a straightforward fix-and-go solution that saves time on site while keeping the connection compliant and durable.

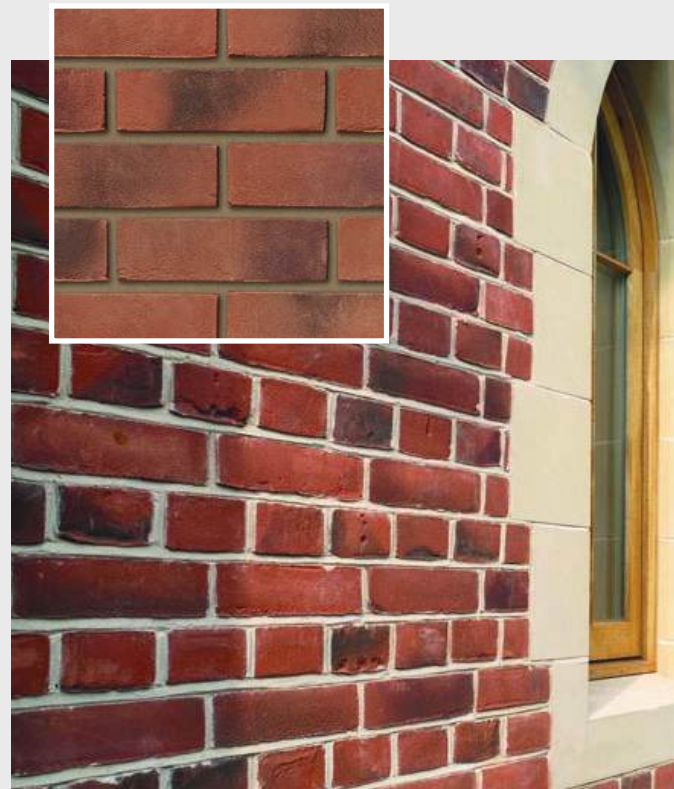

Engineered masonry fixings, structural support systems, and on-site conveniences designed to accelerate installation, reduce cutting, and improve build quality.
