RE: Price Increase Effective from: 01/02/2027

Dear Sir/ Madam,

Thank you for your business and support in 2026. It's been a difficult year so far for all of us as we battle with market headwinds and effects on costs from actions overseas that we have no control over. I am pleased to report that our Kingscourt Brickworks is producing at a consistent high level of output so from a production viewpoint the future looks healthy.

However, I do have to advise you that as from 1st February 2027, our prices will need to increase by 7.5% as the effects of rising costs highlighted above will have a severely negative effect on the business if not addressed.

We realise price uplifts are never welcome, but I am sure you understand given the rising costs increases we have to accept, that we have no choice other than to pass on a proportion of these costs to yourself.

If you have any questions in relation to these points, please call your Breedon Brick Sales Manager or feel free to contact myself.

Yours Sincerely,

Mark Morris
