

TBS Price Increase 1st April 2026

We hope that you are well and thank you for your support of our business in what has continued to be a challenging market for us all.

Over the past 12 months, TBS has been working closely with our supply chain partners to try and mitigate increases in costs such as raw material, labour, shipping and investments in more energy efficient ways to produce their products. However, taking into consideration the inflated costs pressure we are now under, we will have to implement the below price adjustment.

The delivered and collected prices of all our products including, Stock, Wirecut, Waterstruck and special shaped bricks will be increased from the 1st of April 2026 by 4.5%

Implementing the above increase will assist our factories who work closely with TBS to continue to offer you the highest levels of service and quality. TBS will continue to maintain significant volumes of stock across our three UK brick distribution depots to cope with this anticipated uplift in the market towards the second half of 2026.

We would like to again thank you for your continued support

Should have you have any questions, please don't hesitate to contact your relevant Area Sales Manager

Kind Regards

Ben Harper

Sales Director
